

Chopra Circuits

Price list

Package	Price	Included
1. Socket & Switch Call-Out	£95	A focused visit for a minor electrical fault or a small replacement job. Suitable for one or two accessible sockets, switches or light fittings. • Fault checks at agreed points • One small repair or replacement • Basic circuit checks • Tidying of the immediate work area
2. Room Power Refresh	£350	A small room upgrade adding or replacing selected power points and switches. Ideal for a bedroom, home office, utility room or single retail area. • Up to four socket or switch points • Surface or accessible cable routes • Replacement faceplates • Operational checks on completed points
3. Lighting Upgrade	£950	A planned lighting installation for one area or a compact property zone, including new fittings, switching and associated wiring adjustments. • Up to eight light fittings • New or revised switching • LED fitting installation • Testing of lighting circuits
4. Consumer Unit Renewal	£2,250	Replacement of an older consumer unit with a carefully planned board upgrade for a domestic property or small business unit. Existing circuits are reviewed before connection. • Consumer unit replacement • Circuit identification and labelling • Connection of existing circuits • Testing and customer handover
5. Home Rewire Section	£3,250	A substantial rewire of a defined part of a property, such as a kitchen, ground floor or converted loft. The work is coordinated around access and finishing requirements. • New cables to agreed circuits • Sockets, switches and light points • Local consumer unit or board alterations • Testing and circuit information
6. Full House Rewire	£4,750	A coordinated electrical rewire for a typical house, covering power, lighting and dedicated appliance circuits. The installation is planned room by room to provide a consistent system throughout. • Whole-house power and lighting circuits • New switches and socket outlets • Kitchen and appliance supplies • Testing and completed-circuit handover

Package	Price	Included
7. Large Home Electrical Fit-Out	£7,250	A complete electrical installation for a larger home, extension or multi-zone property, including higher point counts and dedicated supplies for modern household equipment. • Multi-room power and lighting • Dedicated kitchen and utility circuits • External lighting or outbuilding feeds • Consumer unit and circuit scheduling
8. Commercial Unit Installation	£9,800	A full electrical fit-out for a small commercial unit such as an office, shop, studio or hospitality space. The layout is developed around equipment, work areas, lighting and customer access. • Commercial lighting and emergency-area provisions • Power distribution for workstations or equipment • Consumer unit and sub-board installation • Testing and labelled handover information
9. Whole-Building Electrical Scheme	£13,500	A large-scale electrical installation for a commercial building, multi-unit property or substantial refurbishment. It covers coordinated distribution, lighting and power across the building with phased access planning. • Building-wide power and lighting installation • Main distribution and sub-board arrangement • Dedicated supplies for plant and equipment • Phased testing and comprehensive handover
